Siyu Chen

Phone: +1-4126285887 | Personal Website: loverem.com

Email: siyuchen19950111@gmail.com

Date of Birth: 01/11/1995

Temporary Address: Pittsburgh | Permanent Address: Shanghai

Education		
2017/09-2018/08	Carnegie Mellon University	Human Computer Interaction M.S
	GPA: 3.92 (Area of focus: Educational Technology)	
2013/09-2016/12	University of Wisconsin-Madison	Computer Science B.S
	GPA: 3.82 (Graduate with distinction)	
Recent Courses		
2018/05-2018/08	Capstone Project Implemented an adaptive learning system that builds personalized learning path for each individual student by using the Bayesian-Knowledge Tracing algorithm. The website was implemented using Angular 6, Spring Boot & MongoDB, served on Ali Cloud.	
2018/02-2018/05	Interactive Data Science Implemented "Dota2 Prediction", a website that predicts the winning side of Dota2 match using machine learning model (Logistic Regression). The website was implemented using JavaScript and Python, served with flask, published on Heroku.	
2017/09-2017/12	Crowd Computing Built the front-end of "Crowd Translator", an app based on the idea of Crowdsourcing that achieves the translation of images, texts or audio using human Intelligence. The app was implemented using Ionic 3.	
Interns		
2017/05-2017/08	Microsoft (Asia-Pacific) team VS China Software Engineer Intern	
	Participated in the development of Azure IoT Developer Kit (Arduino) under Windows, Linux and	
	MacOS system.	
	Won the second prize of Microsoft Hackathon in Sh	nanghai: Built an intelligent Medical Kit/Case
	by implementing an app using ionic3 which interac	ts with the Developer Kit through Azure IoT
	hub. The medical kit utilizes the magnetic sensor to	detect the status and upload in real time. The
	app controls the alarm time/settings and updated correspondingly to the kit.	
2017/02-2017/05 Shanda Games team Legend Studio Game Server/Delphi Do		r/Delphi Developer Intern
	Participated in the "The World of Legend H5" Server (Back-end) development: including the	
	implementation of game logic, game log record and scripts.	
	• Fully Learnt the infrastructure of Database Server and Game Server, including the multi-thread	
	processing and messaging, implementation of main classes and inheritance, and the package	
	transmission between client and server.	
Skills		

Skills

- Java, C/C++, JavaScript, TypeScript Specialty | Familiar with Delphi, Matlab
- Ionic 3 and Angular 6 (HTML5, TypeScript, CSS) full experience
- Cocos2dx & Cocos Creator game development experience
- Arduino development (C programming), Breadboard extension & Printed Circuit Board built experience
- Dynamic website implementation experience with Spring Boot (Java), Mongo Database, MySQL
- Windows, Linux and MacOS development experience
- Strong design skills: Adobe Illustrator, Photoshop, Sketch, Low-fi & Hi-fi prototype design
